Intuitive

Modular

Easy to Use

Easy to Upgrade Exciting Modular System!

Allows you to make your own choices, to suit your needs! Additional options available include the wireless foot control and Osstell ISQ Module

The Implantmed SI-1023 offers a shorter, lighter motor:

SI-1023 Non-optic with cable foot control and WS-75 20:1 non-optic contra-angle	£3,250 (RRP £5,385)
SI-1023 Optic with wireless foot control and WS-75 L 20:1 optic contra-angle	£4,040 (RRP £6,731)
SI-1023 Non-optic with cable foot control and S-11 1:1 non-optic contra-angle	£3,090 (RRP £5,160)
SI-1023 Optic with wireless foot control and S-11 L 1:1 optic contra-angle	£4,060 (RRP £6,780)

OSSTELL ISQ Module

OSSTELL ISQ Module with measurement probe, TestPeg and SmartPeg Mount	£1,900 (RRP £3,643)
SPI Receiver - to enable your Elcomed, Piezomed or Implantmed SI-923 to share the same wireless foot control as your SI-1023	£ 250 (RRP £429)

Implantmed SI - 1023 Safe, Simple, Flexible

Inspirational Surgical unit now with Osstell ISQ Module

Implantmed: Respects your needs – Today and Tomorrow

The New Implantmed is Safe, Simple and Flexible. The combination of the next generation Implantmed and Osstell ISQ module ensures improved treatment safety for you and your patients. The high quality new Implantmed now offers ease of use, flexibility and the exciting optional addition of the Osstell ISQ for precisely measuring implant stability. The new Implantmed is user friendly, extremely intuitive and offers improved freedom of movement thanks to the new wireless foot control. The Osstell ISQ is an important tool for ensuring improved osseo-integration and healing.

The Implantmed SI-1023 offers:

- Exceptionally intuitive, illuminated user interface
- New easy to use pump design
- Ultra-short, powerful electric motor with 6.2 Ncm torque
- Motor speed range: 200 up to 40,000 rpm
- W&H Osstell ISQ module (available as an optional extra) for precise measurement of implant stability
- Precise automatic torque control: 5 up to 80 Ncm
- Automatic thread cutter function
- Thermo washer disinfectable and sterilizable electric motor and cable

The Osstell ISQ

Answers your needs for a fast, accurate, non-invasive and simple way of determining implant stability based on qualifiable data, without jeopardising osseo-integration or the healing process.

The ISQ is especially useful when treating patients at higher risk of implant failure due to poor integration.

The probe magnetically provides a reading from the SmartPeg mounted on the implant without touching it.
